Amendments to the Specification

Please replace the paragraph starting on page 13, line 3, with the following amended paragraph:

Upon viewing the market information or a portion thereof, a trader may wish to send orders to an exchange, cancel orders in a market, change orders in a market, query an exchange, and so on. To do so, the trader may input various commands or signals into one of client devices 108, 110, 112 ~~the client device 104~~, for example, by typing into a keyboard, inputting commands through a mouse, or inputting commands or signals through some other input device. Upon receiving one or more commands or signals, client devices 108, 110, 112 preferably generate transaction information. For instance, a trader may click a mouse button to initiate an order to buy a tradeable object. Then, transaction information would include an order to buy a particular quantity of the tradeable object at a particular price. There are many different types of messages and/or order types that can be submitted, all of which may be considered various types of transaction information. Once generated, transaction information is sent from the client devices 108, 110, 112 ~~client device 104~~ to host exchange 102 over network(s) 120, 122, 124, 126.
